

Internship Certificate

This is to certify that Muhammad Taha has worked as an Computer Vision intern from July 1st, 2025 to August 22, 2025, within trulD Technologies, National Science and Technology Park (NSTP), NUST. During the course of the internship, he worked on multiple problems related to **biometric and document anti-spoofing**, with a focus on:

- **Face Anti-Spoofing:** Understanding spoofing attacks, detecting and differentiating between real and fake faces.
- **Card Spoofing:** Working on scanned and photocopied identity cards to ensure authenticity.
- **Hand Spoofing:** Investigating spoof detection for hands, with emphasis on **screen-based and paper-based spoofs**.
- **Signature Forgery Detection:** Exploring techniques to identify and classify genuine vs forged handwritten signatures.

During his stay at trulD, Taha has worked diligently and passionately to learn new things. He remained punctual throughout the internship and contributed individually and as a team member. We wish him success in the future.

Date: August 22, 2025

Yours Truly
Dr. Abid Rafique
CEO, trulD
